620 Chapter 5 | Integration

## 5.6 Integrals Involving Exponential and Logarithmic Functions

 Exponential and logarithmic functions arise in many real-world applications, especially those involving growth and decay.

• Substitution is often used to evaluate integrals involving exponential functions or logarithms.

## 5.7 Integrals Resulting in Inverse Trigonometric Functions

- Formulas for derivatives of inverse trigonometric functions developed in Derivatives of Exponential and Logarithmic Functions lead directly to integration formulas involving inverse trigonometric functions.
- Use the formulas listed in the rule on integration formulas resulting in inverse trigonometric functions to match up the correct format and make alterations as necessary to solve the problem.
- Substitution is often required to put the integrand in the correct form.

## **CHAPTER 5 REVIEW EXERCISES**

*True or False.* Justify your answer with a proof or a counterexample. Assume all functions f and g are continuous over their domains.

**439.** If f(x) > 0, f'(x) > 0 for all x, then the right-hand rule underestimates the integral  $\int_a^b f(x)$ . Use a graph to justify your answer.

**440.** 
$$\int_{a}^{b} f(x)^{2} dx = \int_{a}^{b} f(x) dx \int_{a}^{b} f(x) dx$$

**441.** If 
$$f(x) \le g(x)$$
 for all  $x \in [a, b]$ , the 
$$\int_a^b f(x) \le \int_a^b g(x).$$

**442.** All continuous functions have an antiderivative.

Evaluate the Riemann sums  $L_4$  and  $R_4$  for the following functions over the specified interval. Compare your answer with the exact answer, when possible, or use a calculator to determine the answer.

**443.** 
$$y = 3x^2 - 2x + 1$$
 over  $[-1, 1]$ 

**444.** 
$$y = \ln(x^2 + 1)$$
 over  $[0, e]$ 

**445.** 
$$y = x^2 \sin x$$
 over  $[0, \pi]$ 

**446.** 
$$y = \sqrt{x} + \frac{1}{x}$$
 over [1, 4]

Evaluate the following integrals.

**447.** 
$$\int_{-1}^{1} (x^3 - 2x^2 + 4x) dx$$

**448.** 
$$\int_{0}^{4} \frac{3t}{\sqrt{1+6t^2}} dt$$

**449.** 
$$\int_{\pi/3}^{\pi/2} 2\sec(2\theta)\tan(2\theta)d\theta$$

**450.** 
$$\int_{0}^{\pi/4} e^{\cos^2 x} \sin x \cos dx$$

Find the antiderivative.

**451.** 
$$\int \frac{dx}{(x+4)^3}$$

$$452. \quad \int x \ln(x^2) dx$$

$$453. \quad \int \frac{4x^2}{\sqrt{1-x^6}} dx$$

**454.** 
$$\int \frac{e^{2x}}{1 + e^{4x}} dx$$

Find the derivative.

$$455. \quad \frac{d}{dt} \int_{0}^{t} \frac{\sin x}{\sqrt{1+x^2}} dx$$
