Homework Solutions
Chapter 4 – Page 259

Exercise 34

(a) This would include the last two classes. It appears to me that the class $[10, 11)$ has a count of about 550 and the class $[11, 12)$ has a count of about 450. The combined count is about 1000, so the percentage is about $\frac{1000}{3990} \times 100\% = 25\%$. You may have made different estimates, but they should be close to mine.

(b) Yes. It is skewed to the left.
