Definitions

Definition (Critical Path for a Vertex)

The **critical path for a vertex** is the path from that vertex to END with the longest processing time.

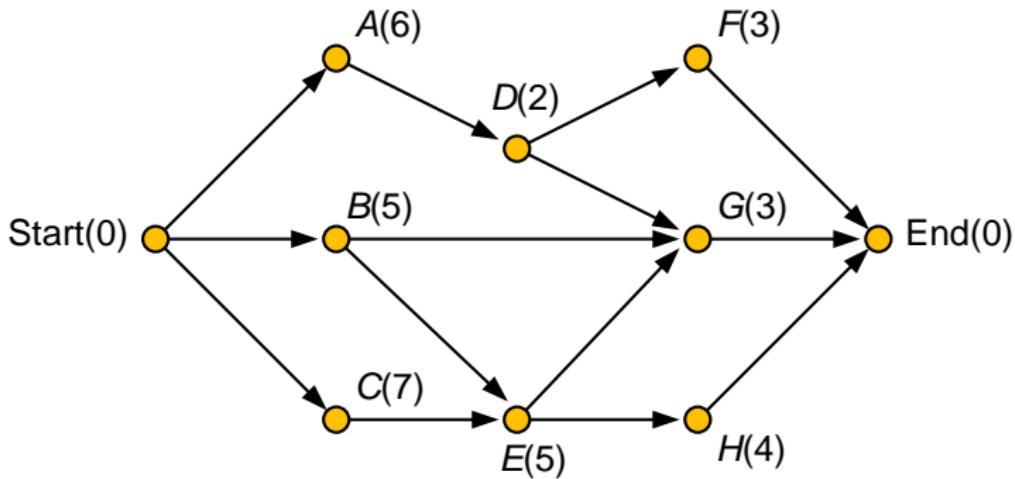

Definition (Critical Path for a Project)

The **critical path for a project** is the critical path from START to END.

Definition (Critical Time)

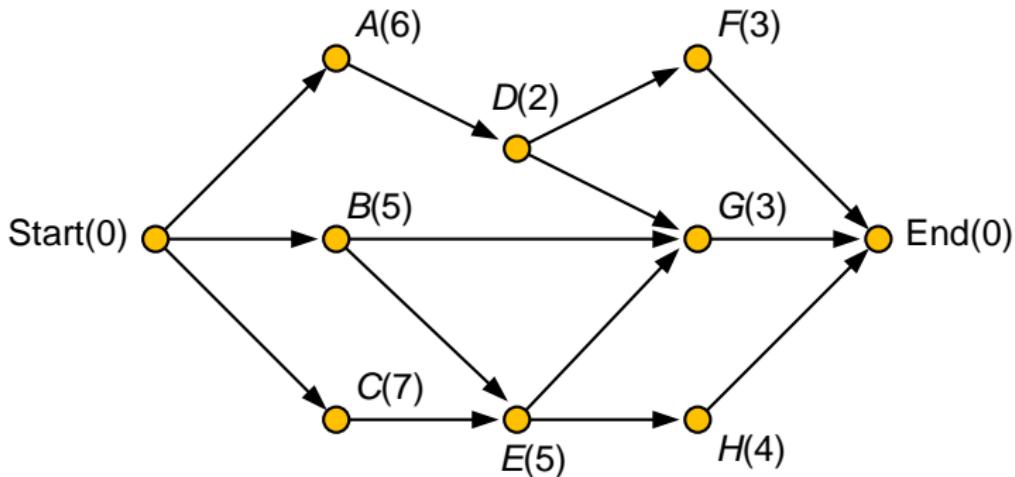

The **critical time** for a vertex or project is the processing time of its critical path.

Example

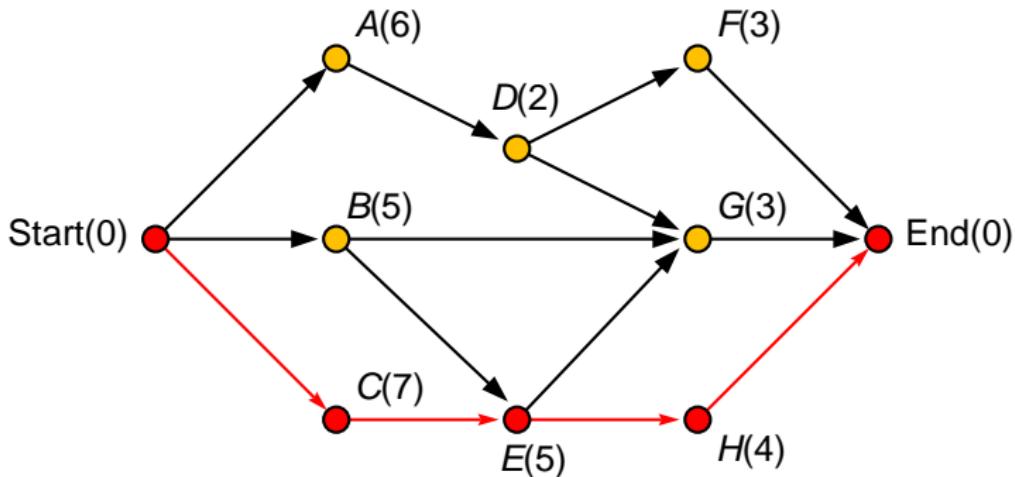

- The critical time of a project is the shortest possible time required to complete the project.

Example

- The critical time of a project is the shortest possible time required to complete the project.
- It is also the longest path (in terms of time) from START to END.

Example

- The critical time of a project is the shortest possible time required to complete the project.
- It is also the longest path (in terms of time) from START to END.

The Backflow Algorithm

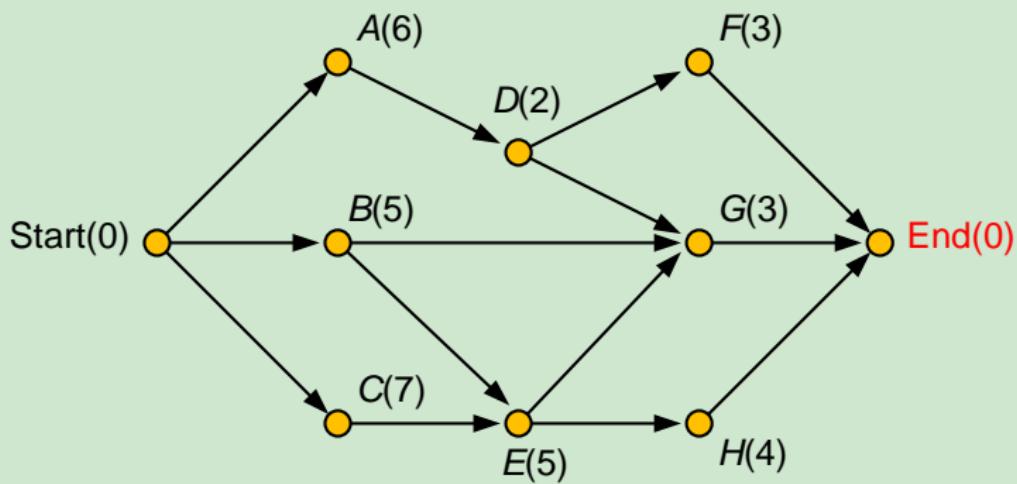

Definition (The Backflow Algorithm)

The **backflow algorithm** finds the critical path by the following method.

- ① Beginning with END and working back to START, find the critical time for each vertex.
 - The critical time for a vertex is the processing time for that vertex plus the largest critical time of the vertices incident from that vertex.
- ② The critical path for the project is the path from START to END whose edges connect each vertex to its successor with the greatest critical time.

The Critical-Path Algorithm

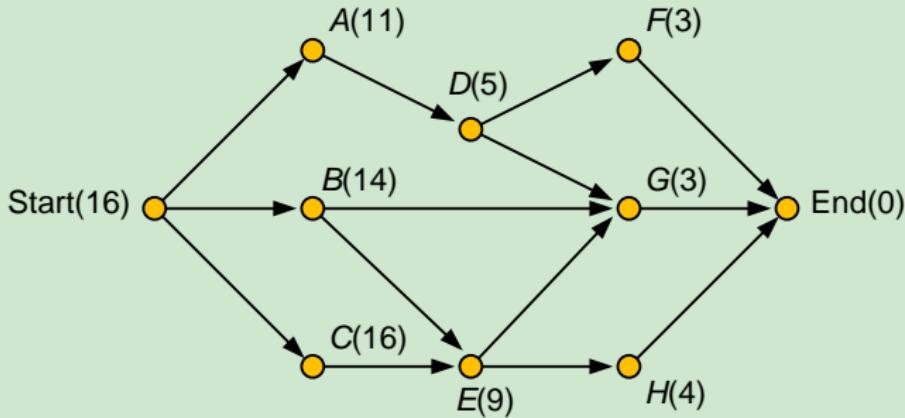

Definition (The Critical-Path Algorithm)

The **critical-path algorithm** creates a schedule by the following method.

- ① Use the backflow algorithm to find the critical time of every task in the project.
- ② Create a priority list with the tasks listed in order of decreasing *critical* time.
- ③ Use the priority list to create a schedule.

Example

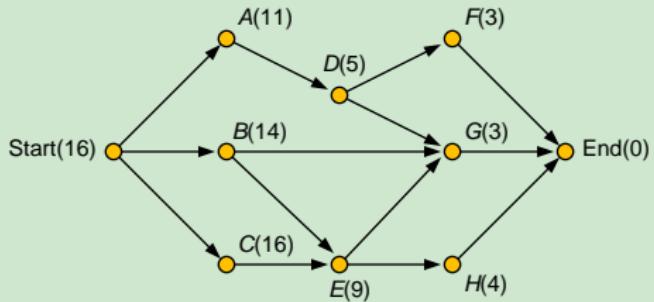

Example (The Critical-Path Algorithm)

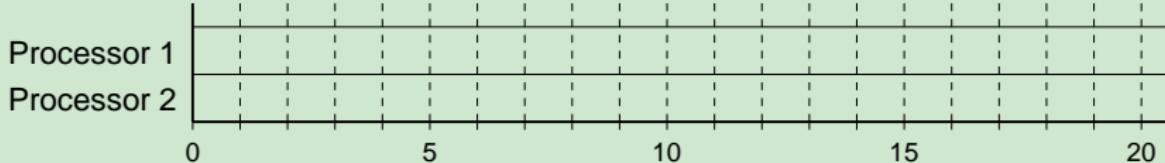

- The priority list is C, B, A, E, D, H, F, G .

Example

Example (The Critical-Path Algorithm)

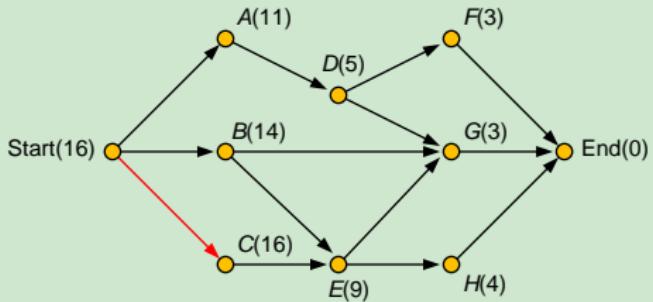

Priority list: C, B, A, E, D, H, F, G

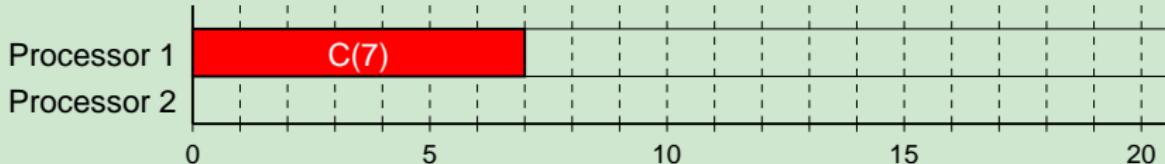

Example

Example (The Critical-Path Algorithm)

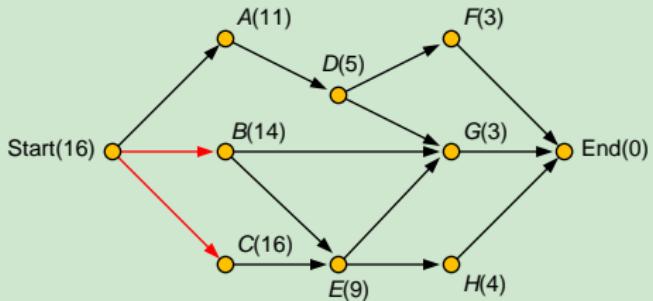

Priority list: **C, B, A, E, D, H, F, G**

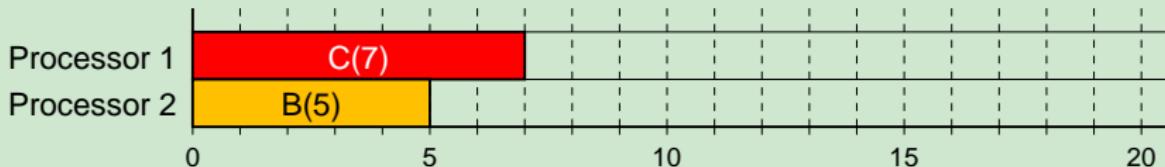

Example

Example (The Critical-Path Algorithm)

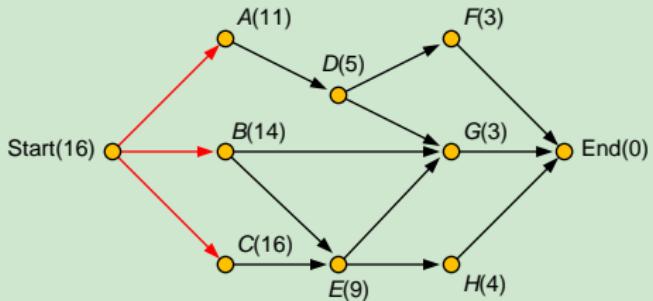

Priority list: **C, B, A, E, D, H, F, G**

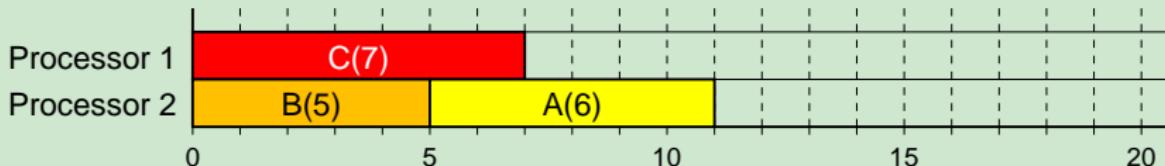

Example

Example (The Critical-Path Algorithm)

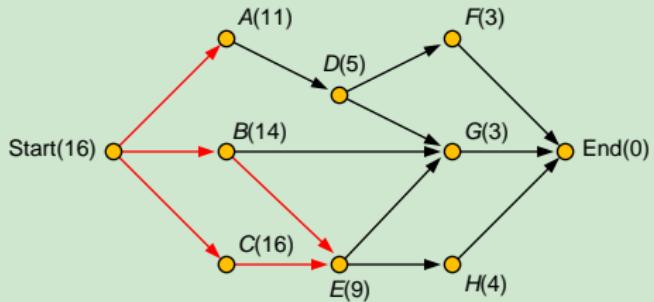

Priority list: **C, B, A, E, D, H, F, G**

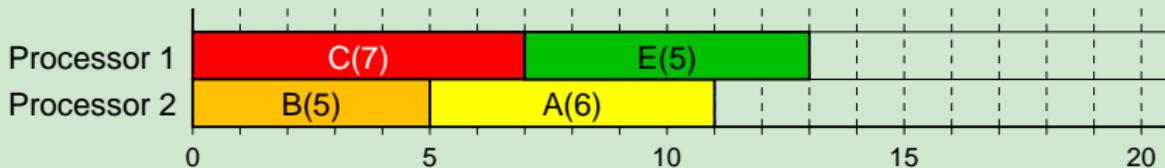

Example

Example (The Critical-Path Algorithm)

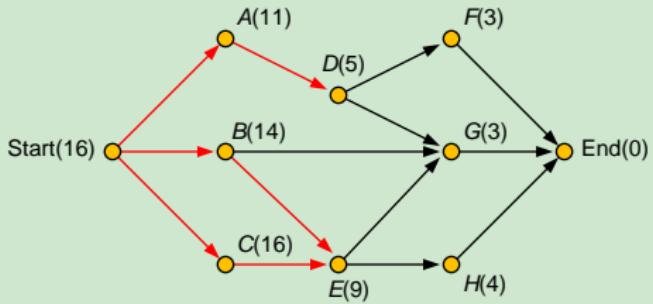

Priority list: **C, B, A, E, D, H, F, G**

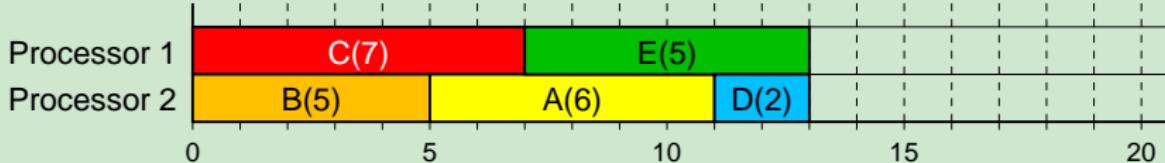

Example

Example (The Critical-Path Algorithm)

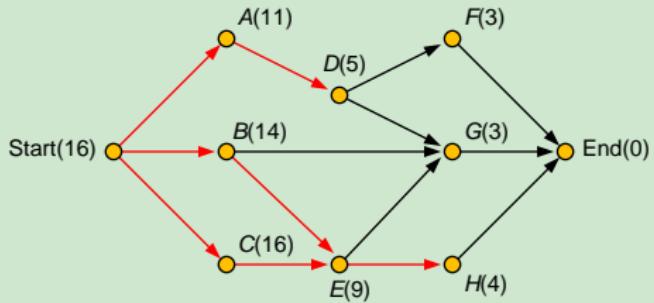

Priority list: *C, B, A, E, D, H, F, G*

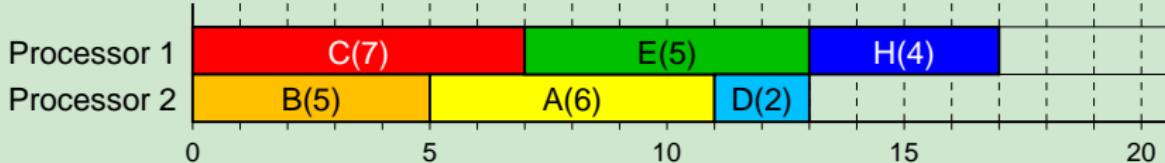

Example

Example (The Critical-Path Algorithm)

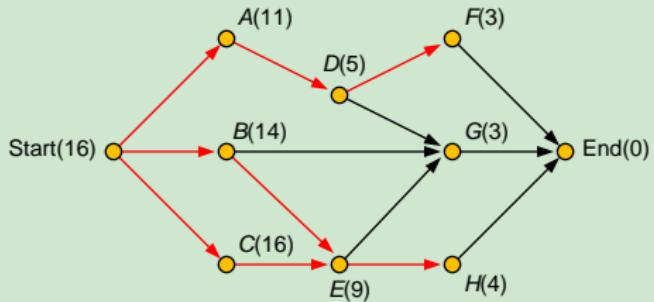

Priority list: *C, B, A, E, D, H, F, G*

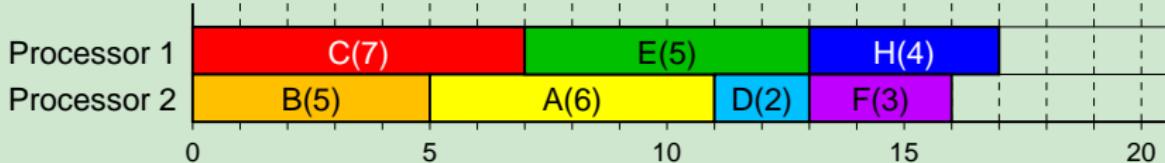

Example

Example (The Critical-Path Algorithm)

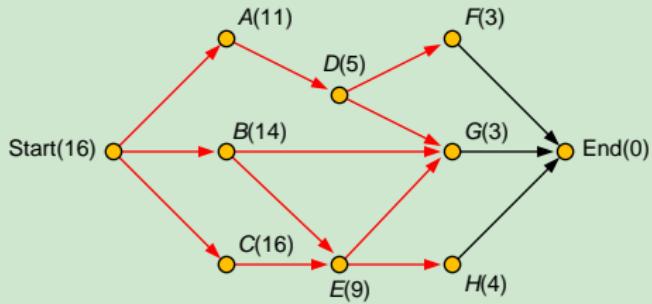

Priority list: *C, B, A, E, D, H, F, G*

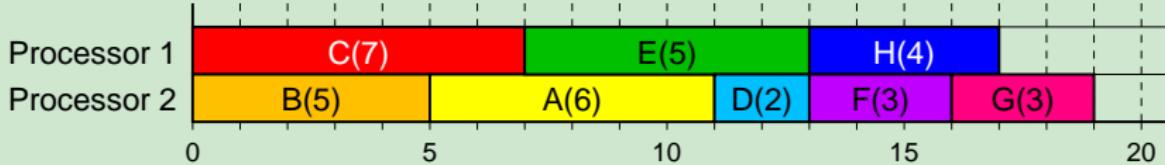

Example

Example (The Critical-Path Algorithm)

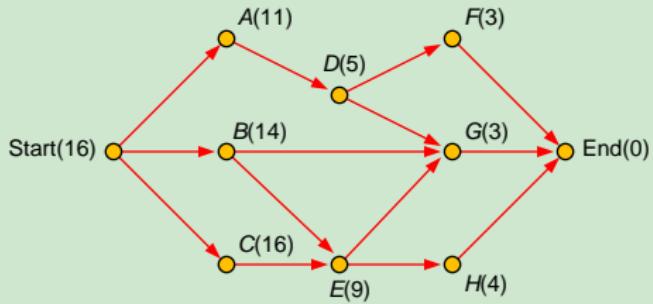

Priority list: *C, B, A, E, D, H, F, G*

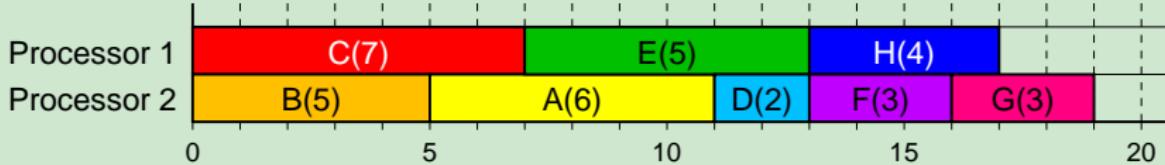

Example

4 Example

5 Assignment

Example (Exercise 55)

Task	Precedent Tasks	Processing Time
A		10
B		5
C	B	4
D	C, G	1
E	D	8
F		3
G	H	7
H	F	1
J	H	6

Example (Exercise 55)

Schedule the tasks using 2 processors.

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	
B		5	
C	B	4	
D	C, G	1	
E	D	8	
F		3	
G	H	7	
H	F	1	
J	H	6	

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	
C	B	4	
D	C, G	1	
E	D	8	
F		3	
G	H	7	
H	F	1	
J	H	6	

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	
C	B	4	
D	C, G	1	
E	D	8	8
F		3	
G	H	7	
H	F	1	
J	H	6	

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	
C	B	4	
D	C, G	1	
E	D	8	8
F		3	
G	H	7	
H	F	1	
J	H	6	6

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	
C	B	4	
D	C, G	1	9
E	D	8	8
F		3	
G	H	7	
H	F	1	
J	H	6	6

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	
C	B	4	13
D	C, G	1	9
E	D	8	8
F		3	
G	H	7	
H	F	1	
J	H	6	6

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	
C	B	4	13
D	C, G	1	9
E	D	8	8
F		3	
G	H	7	16
H	F	1	
J	H	6	6

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	
C	B	4	13
D	C, G	1	9
E	D	8	8
F		3	
G	H	7	16
H	F	1	17
J	H	6	6

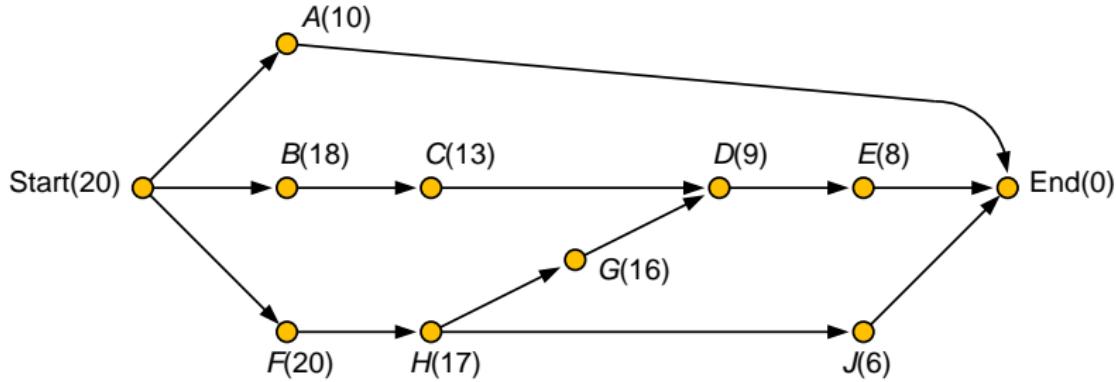

Example (Exercise 55)

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	18
C	B	4	13
D	C, G	1	9
E	D	8	8
F		3	
G	H	7	16
H	F	1	17
J	H	6	6

Example (Exercise 55)

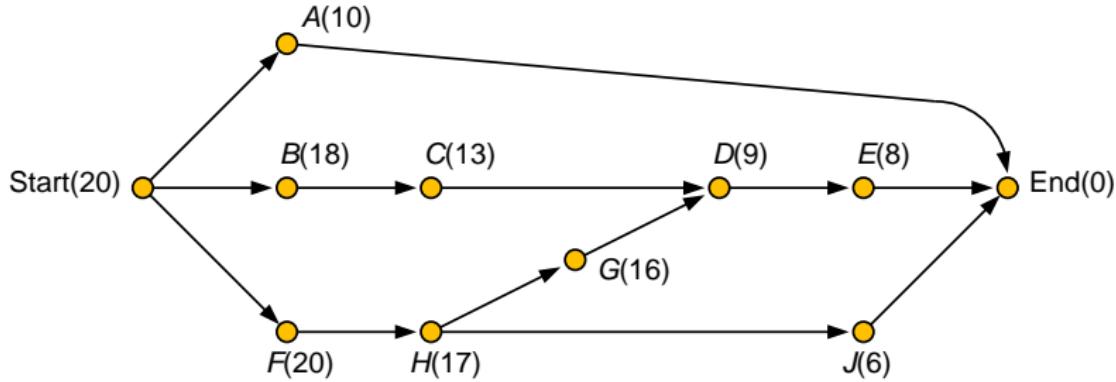

Task	Precedent Tasks	Processing Time	Critical Time
A		10	10
B		5	18
C	B	4	13
D	C, G	1	9
E	D	8	8
F		3	20
G	H	7	16
H	F	1	17
J	H	6	6

Example (Exercise 55)

Schedule the tasks using 2 processors.

Example (Exercise 55)

Schedule the tasks using 3 processors.
