

Homework Solutions

Chapter 3 – Page 196

Review Exercise 40

Enter `133→rand` to set the seed and then enter `randInt(1,8)` and press ENTER twice. You get the numbers 2 and 7. They get Treatment 1. Press ENTER twice more and get 8 and 4. They get Treatment 2. Press ENTER twice again and get 3 and 3. We need two different numbers, so press ENTER again and get 6. So 3 and 6 get Treatment 3. That leaves 1 and 5 to get Treatment 4.
